

## Quick Reference Guide

DURABLE MEDICAL EQUIPMENT PRIOR APPROVAL  
REQUIREMENTS

2024

### Durable Medical Equipment Coverage Guideline

Durable medical equipment (DME) is any equipment that provides therapeutic benefits to a Member because of certain medical conditions and/or illnesses that can withstand repeated use, is primarily and customarily used to serve a medical purpose, and is appropriate for use in the home.

### Prior Approval Requirements

The below listed DME/Supplies require Prior Approval. Please submit a provider prescription and clinical documentation to inform the medical necessity review. Over-the-counter supplies are generally non-covered.

Please note: a separate authorization will be required for conversion from rental of the DME to the purchase of the item.

### Lowest Cost Item That Meets Member Needs

Whether the Member rents or buys Durable Medical Equipment (DME), the Plan provides Benefits for the least expensive (and, if applicable, lowest technology) equipment necessary to meet Member's medical needs.

DME supplied by an out-of-network sole source provider that can be adequately fulfilled by an in-network provider does not meet benefit coverage based on medical necessity. Each request is reviewed on a case-by-case basis.

When rented equipment is a covered benefit and medically necessary, Health Options will reimburse only until our share of the reasonable purchase price of the least expensive equipment is paid or until the equipment is no longer necessary, whichever comes first.

### Durable Medical Equipment Rentals

Capped rentals – Durable medical equipment that a Member uses continuously over a relatively short period of time, where rental is more appropriate than purchase, as determined by Community Health Options (Health Options). Therefore, capped rental items are reimbursed by Health Options as rentals rather than as purchases. Capped rental payment includes all related costs for the effective use of the equipment by the Member, including equipment, accessories, supplies, delivery, shipping and handling, labor, setup, visits, patient education, maintenance, repairs, and replacement parts of the DME item in question. Please note that in order for DME items to be eligible for reimbursement, the DME supplier must meet eligibility and/or credentialing requirements as defined by Health Options.

### Durable Equipment Repair and Replacement

Include initial date of purchase, manufacturer name, model number, and serial number when submitting a Prior Approval request for previously purchased DME replacement.

Repair of non-routine service for durable medical equipment (other than oxygen) requiring the skill of a technician, labor component, per 15 minutes. Repair or non-routine service for oxygen equipment requiring the skill of a technician, labor component, per 15 minutes. A prescription will be required along with a statement of what is being repaired. An estimate of the cost (supplies and labor) is required.
